# ROADMAP 2025

**Improvements in SuiteTax solution**
- Simpler and faster accounting and calculation of VAT using native SuiteTax mechanisms
- Full compliance of SuiteTax settings with the PLP configuration

**Enhancements in VAT declarations and support of special VAT schemes — OSS and SME**
- Improved functionality of amended VAT–UE declarations — option to generate adjustments to amended declarations
- Full compliance and automated calculation of tax when using special VAT schemes

**Introduction of a new JPK CIT functionality**
- Expansion and adjustment of the existing JPK_KR declaration in line with the JPK_KR_PD requirements
- Option to send an annual declaration
- Faster JPK_KR reports

**Improvements in the cash method and accounting for bad debt relief**
- Automation of processes related to creating and reversing bad debt relief
- Full support of transactions recognised on the cash basis for VAT purposes

**Development of the e–invoicing (KSeF) functionality**
- Expansion of the module taking into account the planned changes in the law and new data structure
- Introduction of high automation of the purchase process — generating vendor bills on the basis of KSeF documents received

**Improvements in translation and multilingual printouts for domestic and international entities**
- More options to customise printouts for specific client needs
- Development of the Polish language version of the interface
- Introduction of Polish translations of the interface
- Option to use printouts also for international entities

**Development of the bank integration functionality**
- Support of new formats of exporting payment documents
- Option of direct integration of the system with the bank without manual file import
- Expanded list of the available file formats for exporting payment data
- Improved efficiency of generating payment files

**Support in accounting for international entities which are registered for tax in Poland**
- Enabling tax settlement for entities registered for VAT in Poland without the need to set up an independent entity in NetSuite
- Option to account for transactions of a Polish branch whose records are not kept in PLN as the main currency of the entity

**New RedWood interface — enhancements in creating and generating reports**
- Generating advanced and visually appealing reports which take advantage of the improvements provided by the RedWood interface

**Expansion of the PLP Inventory module**
- Additional printouts and warehouse reports made available in the Polish language version
- Faster generation of JPK_MAG declarations
