VALUE ADDED TAXES

VAT

VAT corrections in favour of the administration for more than CHF 550 million!

Between 2021 and 2022, the VAT division of the Federal Tax Administration carried out around 30,000 VAT audits. These audits resulted in

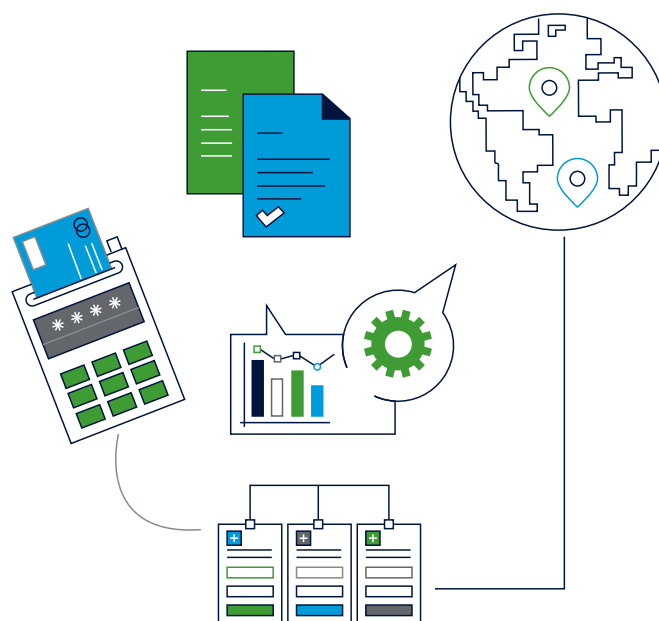

- VAT corrections in favour of the administration of around CHF 555,971,000
- VAT refund for registered companies of around CHF 135,436,000.

These staggering amounts show that VAT audits are rarely neutral for businesses, and that inaccurate VAT management can have serious consequences.

At RSM, we understand the complexities that a business can face in optimising its VAT management, especially when the company does not have a dedicated expert team.

With limited in-house resources, businesses often rely on accounting systems that incorporate minimal VAT logic, inevitably exposing the organisation to risk. What is often lacking is a **strategic plan for managing VAT on a national and international scale**. At RSM, we believe that such a plan can reduce risk, allow to identify opportunities, and to embed clear, reusable processes to reduce the time spent internally ensuring VAT compliance. As a result, you can focus on your business, free from the threat of a VAT audit.

Our VAT experts will be happy to help you implement this strategic VAT plan, whatever your company's sector of economic activity, in Switzerland or abroad.
